Productivity		Coefficient		Quality		Coefficient	
formula: Productivity= $\frac{\text{output}}{\text{input}}$ $\frac{\text{No. project} \times \text{coefficient}}{\text{member} \times \text{time}(*\text{working hours})}$		Revision		A (Translation mistake) × 0 B (Overlap) × 0.2 C (Not following Rules) × 0.5 D (Not following instruction) × 1			
		A: × 1 B: × 2 C: × 3 D: × 5					
		Basic					
		A: × 2 B: × 4 C: × 6 D: × 8		* For feedbacks from the request is separate evaluation			
						Mistake type:	
Plan Type:				A	B	C	D
Revision		Basic		Total			
		1st & 2nd					
		Final					
Y	N	Conditions		Y	N	Conditions	
		Basic DP/EP (check Y if new project)				room floor heights are properly labeled (FL-/FL+)	
		Basic EP (with or without DP)				ceiling heights are properly labeled (CH=)	
		all the pages are in order (PDF and printed)				flooring symbol is properly oriented	
		contract code is correct and match all pages				cold water supply for toilet, laundry and outdoor basin	
		project name is correct and match all pages				hot and cold water supply for shower, kitchen sink, and vanity	
		company logo is correct and match all pages				floor access symbol for dressing room	
		date is updated and match all pages				floor storage for kitchen	
		architect, IC and sales' name are indicated				ceiling access (2F or attic/loft/PH)	
		title block is updated with additional notes (DP/EP)				wall access (attic/loft/PH)	
		Site Plan				area chart is updated and match all floors	
		boundary lines are properly labeled				Elevation Plan	
		house outline is thick				north, south, east, west side are correct and properly placed	
		kyuusekizu values match the boundary lines				south and east sides have dimension lines	
		symbol for drain is correct and complete				walls have correct finish and hatching	
		symbol for rainwater drain is correct and connected to spout				roof material is correct	
		contract code and project name are correct in the information table				roof slope is correct and indicated	
		site area matches the kyuusekizu table				noki dimension has parentheses	
		maximum height matches elevation plan				keraba dimension has parentheses	
		floor areas are updated and match DP area chart				(+60) keraba allowance for colonial/metal roof	
		construction and lot areas are updated and match DP area chart				(+100) keraba allowance for tiled roof	
		site compass has correct angle				hipped roofs have snow stoppers	
		building coverage ratio is correct and less than requirement				solar panels are updated and match request	
		floor area ratio is correct and less than requirement				windows/door count matches DP	
		Presentation/Detailed Plan				gutter and spout symbols are updated	
		torishin lines are correct and match P/DP/EP				foundation height is correct	
		dimension lines are measuring the rooms' wall (center-to-center)				1F/2F heights are correct	
		walls have finishes on all sides				attic height is 1400 (+36 for 2F height)	
		posts are on-grid				maximum height is computed and correct	
		posts not on-grid have dimension lines				labels are not overlapping	
		labels are not overlapping with other labels				Electrical Plan	
		labels are not overlapping with other symbols				floor plan is updated and matched DP	
		the doors are complete with specifications				floor plan details are thin-lined (line 6)	
		(ACTIE) swing doors have doorstoppers				electrical details are thick-lined (line 5)	
		the windows are complete with proper specs				amount of downlight is correct	
		window FL height matches the request				amount of outlets per room is correct	
		window type matches the request				each appliance has its own outlet with correct label	
		door and windows sizes are correct				areas/rooms have at least 1 light each	
		sash name matches the request				lights are connected to switches	
		(ACTIE) 330 sash for other types of window				2-way switches are used for hall and stairs	
		room and area names are indicated				(CLEV) use M and MT for multimedia	
		porch heights are properly labeled (GL+)				use TV and Tel with convenience outlets	
REMINDERS!!!						there is 1 heater remote near the kitchen	
	Yes	No	Data on server			there is 1 heater remote inside UB	
Archidata			Name:			there is 1 floor heater remote (if applicable)	
PDF						there is 1 PC board for solar panel	
E-Mail			Note: Please submit this checklist to Joshua san after the plan is finished for recording. Thank you!
